

Dear Sir / Madam

I would like to take this opportunity to introduce our company, American Health Care Academy (AHCA), which has offered a wide range of medical training courses for several years to a growing population. Our mission is to promote, preserve, and improve the health and well-being of individuals and communities by offering professional, up-to-date, and high-quality health training. Through our Continuing Education (CE) courses, we aim to offer lifelong learning opportunities that contribute to the professional development of our students while equipping them with the skills to be good Samaritans in the community.

Our courses include: *CPR and AED Certification, First Aid Certification, Healthcare Provider CPR Certification, CPR and First Aid Combo Certification, Healthcare Provider CPR and First Aid Combo Certification, Bloodborne Pathogen Certification, Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS).*

Our courses are nationally accepted and accredited by various national and state certifying bodies. Our training meets and often exceeds the requirements set by Emergency Cardiovascular Care and OSHA. Our instructors have passed courses by the American Heart Association, and our course curriculum follows the American Heart Association's guidelines.

Our courses apply to many professions such as nursing, education, adult and child care, as well as athletic training. Most of our courses require no previous training or preparation. Our *Healthcare Provider* and other more advanced courses, like *ACLS* and *PALS*, mention who the course is intended for, i.e. medical professionals, while our basic *CPR and First Aid* courses mention that the target student can range from lay responders to medical professionals. We provide certification and recertification options for all of our courses.

At AHCA, we teach our courses online or through a blended, hands-on skills training. Our online courses are self-paced and very descriptive, with a final quiz that individuals must pass for certification. Our hands-on courses are conducted virtually with a student to instructor ratio of 6 to 1. When a student chooses the hands-on skill assessment, they receive a manikin to practice the CPR skills on. Our instructor leads a Zoom call to evaluate and provide feedback to the student using a hands-on CPR skills checklist.

Please visit our website <https://cpraedcourse.com/> for more details. If you have any other questions or concerns, you may contact us via phone or email. We look forward to discussing your needs and how American Health Care Academy can meet them, both currently and in the future.

Sincerely,
The Team at American Health Care Academy
